Contemporary Picket

V352-4TR Scalloped Contemporary 'Thru-Rail' Picket with Dog Ear Tops

Illusions® Contemporary Picket offers what is known as the "good neighbor" approach to fencing for homeowners. It is a fence that features both sides of the panels being exactly the same.

It is manufactured to follow the basic picket fence design with an added twist. The pickets are assembled **THROUGH** the rails instead of simply being attached to them. This is what gives the fence its unique and useful appearance.

Available in heights from 3' to 8'.

The Illusions® Advantage

All Illusions® Profiles Meet ASTM F964-09. Control Tests Including:

- D256 To determine Izod impact properties
- D618 Practice for Conditioning Plastics for Testing
- D635 Test Method for Rate of Burning and/or Extent and Time of Burning of Plastics in a Horizontal Position
- D638 To determine tensile properties
- D648 To determine heat distortion temperature
- D696 Test Method for Coefficient of Linear Thermal Expansion of Plastics Between 030°C and 30°C with a Vitreous Silica Dilatometer
- D790 To determine flexural properties
- D792 To determine specific gravity
- D883 Terminology Relating to Plastics
- D1435 Practice for Outdoor Weathering of Plastics
- D1600 Terminology for Abbreviated Terms Relating to Plastics
- D1784 Specification for Rigid Poly (Vinyl Chloride) (PVC) Compounds and Chlorinated Poly (Vinyl Chloride) (CPVC) Compounds
- D1898 Practice for Sampling of Plastics
- D2240 To determine Shore hardness values
- D2244 Practice for Calculation of Color Tolerances and Color Differences from Instrumentally Measured Color Coordinates
- D2565 Practice for Xenon-Arc Exposure of Plastics Intended for Outdoor Applications
- D4216 Material Class Number 1-32333-3. To establish Cell Classification of PVC material. Illusions compounds have higher cell classification because one or more properties are superior to those used in standard acceptable compounds
- D4226 Test Methods for Impact Resistance of Rigid Poly-(Vinyl Chloride) (PVC) Building Products
- D4726 Specification for Rigid Poly(Vinyl Chloride) (PVC) Exterior-Profile Extrusions Used for Assembled Windows and Doors
- E-84-04 Used to determine the flame spread value of PVC material; Illusions® burn rate is significantly lower than allowed value

All Illusions® Vinyl Fences and Railings are made from 100% Pure Virgin Vinyl materials. Why would this matter? – Keep reading below...

Beware of fences with a cheap variety of fillers. What is in the mixture? Lead? Shower curtains? Low grade plastics and weak decomposing items that will splinter, crack, break or deteriorate structurally and rapidly fade color of the fence?

This will not happen with an Illusions® Fence. Check the side bar for a list of ASTM tests that Illusions® Vinyl Fences must pass before we put our name on them. This is quite simply the reason that Illusions® Vinyl Fence styles are specified by more landscape architects than any other vinyl fence.

Make sure to use only professional Illusions® Fence Dealers that will help you design and layout the best fence for your needs. The Illusions® Professional Fence Dealer is also a qualified vinyl fence installation company. Reliable, honest, licensed, and a pleasure to deal with. You will recommend them to your neighbors proudly.

Consistent Color Retention

Illusions® materials are a custom blended mix of stabilizers, impact

modifiers, processing aids, and pigments. Long term weathering studies have shown these products tin stabilized, acrylate modified formulations with high levels of titanium dioxide (a pigment and UV light screener) result in the **best retention of color and toughness.**

Our vinyl has the industry leading standard of 10 parts per 100 TiO2 (titanium dioxide) to give it the longevity and performance of a lifetime product.

The Illusions® 75MPH Wind Kit™

The Most Available 75 MPH Wind Certified Styles in the World

Will it hold up to an F5 tornado? Probably not. But in order to be certified, it had to sustain gusts up to 130 MPH for as long as 30-40 seconds. The Miami-Dade 75 MPH certification states that when properly installed, approved styles of Illusions® fencing will withstand sustained 75 MPH winds. With 26 Styles available for immediate shipment, Illusions® Vinyl Fence has the most Miami-Dade County High Velocity Hurricane Zone Certified styles of vinyl fence available in the world. All of which are 8' wide panels to speed up installation time.
